ALL RIGHTS RESERVED © ASAP INTERNATIONAL SDN. BHD.

“ASAP” stands for “Art & Science of Amazing Protection”. Our concept combines the elements of Art and Science, in providing the Art of protection merged with improvements through the wonders of Science.

ASAP products are made uniquely catering to medical, research & development, building & construction, cleanroom facilities, food & beverage handling as well as other industries’ use. A wide range of disposable products standing at more than 150 SKUs is currently offered and we are continuously expanding to meet your needs.

Put simply, ASAP products are the result of innovative ideas and advanced technology. It is this formula that has propelled our products to the industry’s forefront, and that continues to set industrial benchmarks.

To discover what ASAP all is about, simply slip on our products, and be captivated by the art and science of ASAP!

### ISO 14001:2015

- ASAP’s Environmental Management System (EMS) ensures optimum efficiency at keeping environmental impact to a minimum level throughout the production process while maximizing the output without compromising product qualities.

### ISO 9001:2015

ISO Quality Management System (QMS) application ensures ASAP adheres to the level of consistency in providing any products and services, as well as the assurance of conformity that meet customers’ applicable statutory and regulatory requirements.

### ISO 13485:2016

Medical devices – Quality Management Systems is to enhance ASAP products’ quality benchmarks, as well as the safety during various stages of life-cycle including design, R&D, production, storage and distribution.

## WHY ASAP FOOD SAFE DISPOSABLE PPE?

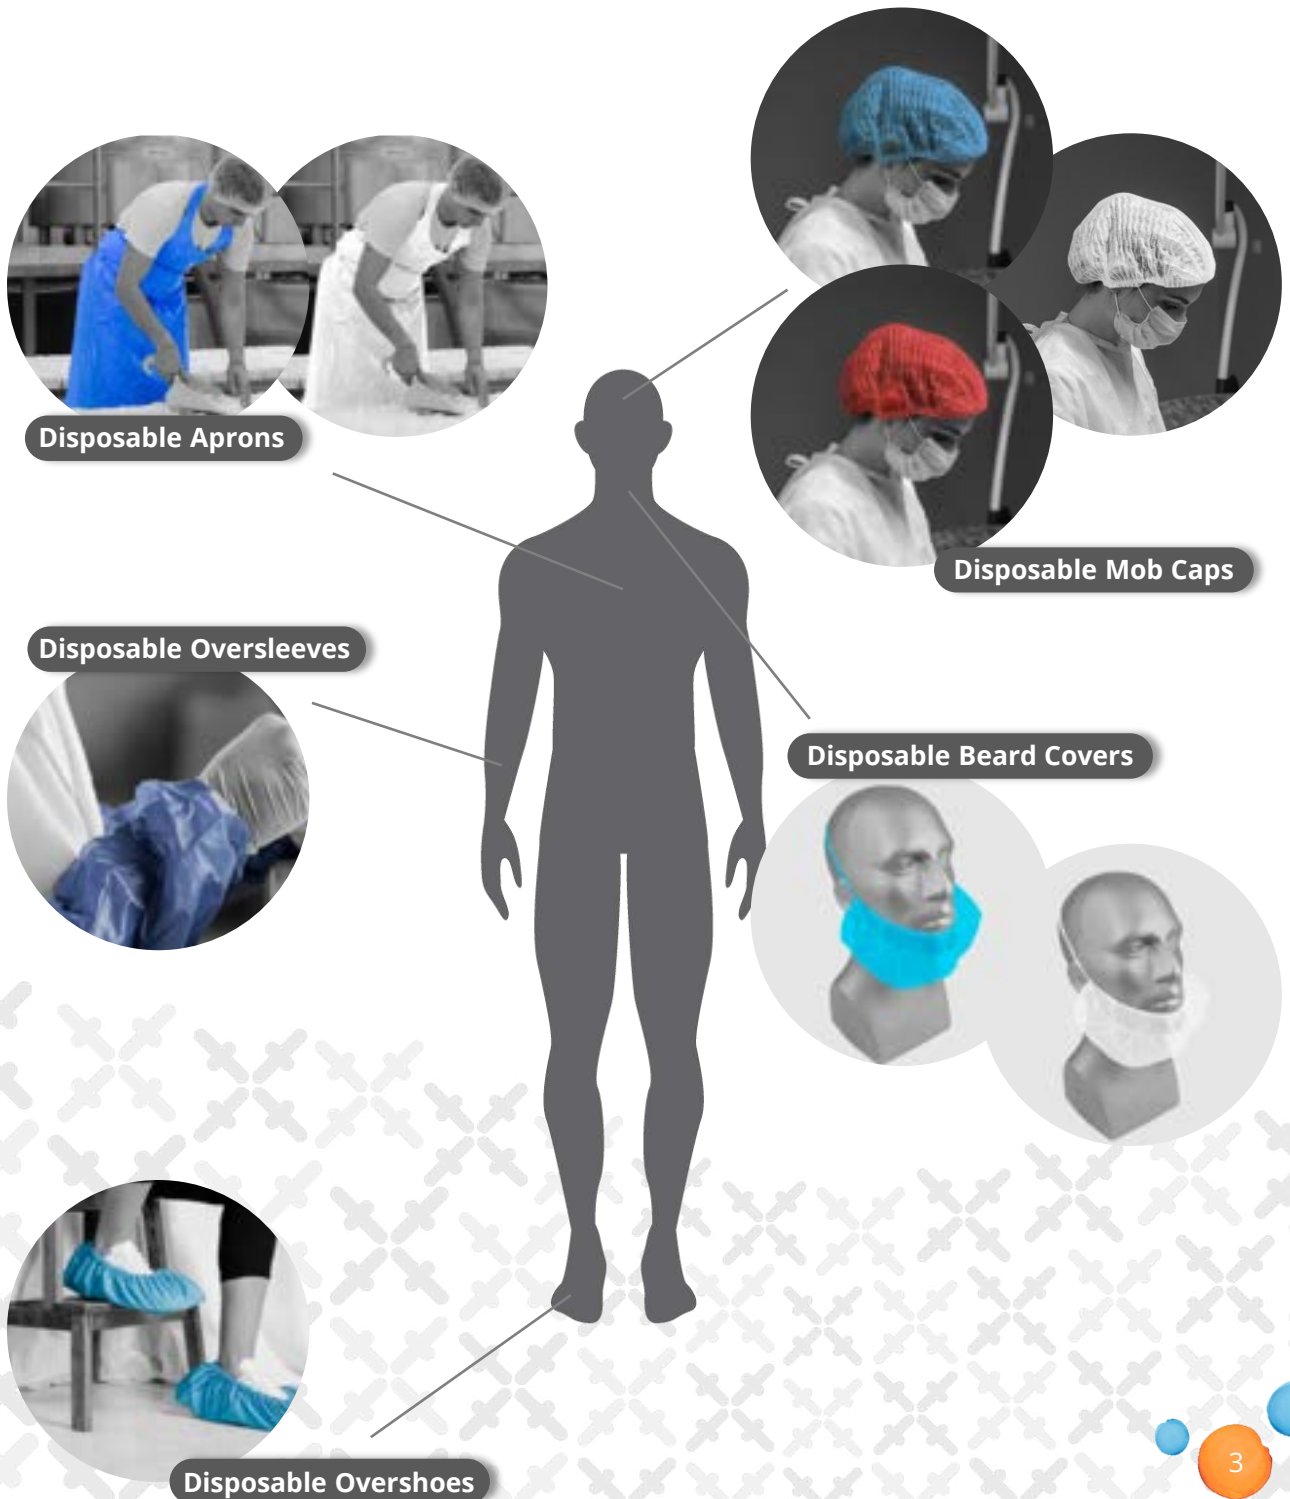

Cross-contamination poses a pressing concern in the food processing industry. Its consequences can be severe, as it facilitates the transfer of harmful pathogens, allergens, and contaminants between different food products. This transmission can occur through direct contact between contaminated and uncontaminated foods, as well as through surfaces, equipment, utensils, or even personnel.

**ASAP Food Safe Disposable PPE** (Personal Protective Equipment) act as a formidable barrier between food handlers and potential sources of contamination. By employing these protective measures, the risk of cross-contamination is effectively minimized, guaranteeing the production of food products that are both safe and of the highest quality.

Versatile Protection.*

**ASAP FOOD SAFE DISPOSABLE PPE**

## BENEFITS OF FOOD SAFE DISPOSABLE PPE SERIES

### Disposable Mob Caps

Mob caps are used to prevent hair from falling onto food during handling/processing. Loose hair can contain microorganisms that may contaminate the food. Wearing mob caps helps to minimize this risk.

### Disposable Aprons

Aprons provide an additional layer of protection against cross-contamination. They prevent food from coming into contact with food handlers' clothing during the course of handling, which may carry contaminants.

### Disposable Oversleeves

Oversleeves with dual-elastic ends provide increased protection for handlers from fingertips to elbow when used with a glove while preventing cross-contamination from happening in food processing/handling setups.

### Disposable Overshoes

Overshoes with embossed/grip surface are needed in food handling/processing areas that are generally damp/wet to prevent slipping hazard, as well as to protect footwears from contamination, splashback, and other substances.

### Disposable Beard Covers

Disposable beard covers are essential in preventing cross-contamination in food processing industries by acting as a barrier that prevents facial hair that potentially carry pathogens and bacteria from falling and coming into direct contact with food, surface, or equipment.

### One Size Fits All

Elastic bands are used on all our ASAP Food Safe Disposable PPE Series to fit various users' body size so that you only need 1 variant for all your staffs.

### Regulations

- PPE Regulation (EU) 2016/425
- Food Contact Regulation (EU) 2020/1245 of Regulation (EU) No 10/2011

At ASAP, we are committed to hygiene control and quality assurance. Proper hygiene standard is practiced throughout the development of all ASAP products from raw materials handling, processing, production, inspection, to our finished product to deliver high quality products while limiting risk of cross contamination.

Look for the Hygiene Matters logo, quality and hygiene you can trust.

## Instruction For Use

### DISPOSABLE MOB CAPS

1. Ensure hands are clean and dry before handling the disposable mob caps.
2. Place the mob cap over the head with both hands, covering all the hair, and adjust for a secure and comfortable fit.
3. After use, carefully remove the mob cap by holding the elastic band and dispose properly.

### DISPOSABLE APRONS

1. Ensure hands are clean and dry before handling the disposable aprons.
2. Slip the apron over the head, ensuring it covers the front of the torso and extends below the waist, then fasten the apron securely with the ties.
3. After use, untie and remove the apron and dispose properly.

### DISPOSABLE OVERSLEEVES

1. Ensure hands and arms are clean and dry before handling the disposable oversleeves.
2. Slip the oversleeves over the arm, starting from the wrist and extending up towards the elbow or desired coverage area and repeat for the other arm.
3. After use, carefully remove the oversleeves by rolling them down from the top and dispose properly.

### DISPOSABLE OVERSHOES

1. Ensure hands and shoes are clean and dry before handling the disposable overshoes.
2. Hold the overshoes by the elastic band opening and slide your foot into the overshoes ensuring it covers the entire footwear and repeat for the other foot.
3. After use, carefully remove the overshoes by pulling them off from the ankle area and dispose properly.

### DISPOSABLE BEARD COVERS

1. Ensure face and beard are clean and dry before handling the disposable beard covers.
2. Hold the overshoes by its elastic band and gently position it over your beard, ensuring full coverage; secure it comfortably in place.
3. After use, carefully pull the beard cover off from the edges, starting at the bottom, and dispose properly.

## CAUTION

### ALLERGY INFORMATION

Components used in making the ASAP Food Safe Disposable PPE Series items may cause allergy reactions in some individuals. Do not expose these items to any person with a known or suspected sensitivity to Polypropylene, Polyethylene or components used in the manufacture of these disposable PPEs before consulting a physician. If allergy reactions occur, discontinue use immediately and consult with a physician. Users are responsible for determining PPEs suitable to be used for individual specific applications.
