CLEANROOM
NITRILE

POWDER FREE
DISPOSABLE
GLOVES

***Uncompromised** Comfort*
***Unmatched** Protection*

Series No.:
20170-5 Series Nitrile Cleanroom Powder Free Disposable Gloves

BENEFITS OF NITRILE CLEANROOM DISPOSABLE GLOVES

Take Charge of Contamination Level: Fifty pairs packed in a Class 100 environment, double vacuumed bagged in a cleanroom compatible packaging and then packed into a lined shipper carton.

Peace of Mind: Made with 100% nitrile, powder-free, and free from plasticizers, silicone, or pigments, providing peace of mind for users with latex allergies and sensitivities.

Regulatory Excellence Compliance: Rigorously tested and certified, our gloves meet and exceed a comprehensive range of regulations, including CAT III PPE Regulation (EU) 2016/425, Food Contact Regulation (EU) 1935/2004, and a suite of harmonized standards for your complete trust.

Skin-Friendly Solution: Powder-free formulation offer wearers worry-free hand protection solutions especially for individuals with latex allergies and sensitivities.

Maximize Comfort, Minimize Distractions: These gloves are soft and strong with flexible polymer formulation which allows for an improved user fit and can be worn for an extended prior without discomfort.

Chemical Resistance: These gloves offer resistance to a wide range of chemicals (EN Chemicals JKPT), enhancing their versatility in various industries.

Static Safe Design: Static safe as per EN 1149-5, making them ideal for safely handling electronic components and sensitive materials.

Versatile Applications: Ideal for various industries including EV battery and semiconductor manufacturing, pharmaceutical research, and other cleanroom settings, providing consistent performance across diverse environments.

At ASAP, we are committed to hygiene control and quality assurance. Proper hygiene standard is practiced throughout the development of all ASAP products from raw materials handling, processing, production, inspection, to our finished product to deliver high quality products while limiting risk of cross-contamination.

Look for the Hygiene Matters™ logo, quality and hygiene you can trust.

Instructions For Use

Description - Cleanroom Nitrile Powder Free Disposable Gloves, Non-sterile, Single Use Only.

Intended Use - ASAP Cleanroom nitrile glove is a disposable glove product worn to protect the hand of wearer against mechanical action whose effects are superficial, cleaning materials of weak action and easily reversible effects.

How To Don Gloves - Inspect the gloves to ensure there are no pinholes or tears. If gloves are ambidextrous, they can be worn on either hand. If not, align the glove's fingers and thumb with the proper hand before donning. Insert five fingers into the cuff and pull the cuff over the wrist. Check for a secure fit around the fingers and palm. The cuff should fit snugly around the wrist.

How To Doff Gloves - After use, users should visually check the glove and remove any contamination from the outer surface before removing the gloves from the hands. Grasp the outside edge of the glove near the wrist. Peel the glove away from the hand, turning it inside out. Hold it in the opposite glove hand. Slide an ungloved finger under the wrist of the remaining glove, be careful not to touch the outside of the glove. Peel the remaining glove off from the inside, creating a "bag" containing both gloves. Discard.

Disposal - Properly dispose of all used nitrile glove. Follow your institution's policies for use and disposal of these gloves.

Storage - Store in a dry place. Avoid excessive heat (30°C). Exposed product should be shielded from direct sunlight, intense artificial light, x-ray machines, and other source of ozone.

Shelf Life - Three years from the manufacturing date.

Warning - These gloves are for single and transient use only.

Caution - This information does not reflect the actual duration of protection in the workplace and the differentiation between mixtures and pure chemicals. The chemical resistance has been assessed under laboratory conditions from samples taken from the palm only (except in cases where the glove is equal or over 400mm - where the cuff is also tested) and relates only to the chemical tested.

It can be different if the chemical is used in a mixture. It is recommended to check that the gloves are suitable for the intended use because the conditions at the workplace may differ from the type test depending on the temperature, abrasion, and degradation. When used, protective gloves may provide less resistance to the dangerous chemical due to changes in the physical properties. Movements, snagging, rubbing, degradation caused by the chemical contact etc. may reduce the actual use time significantly.

For corrosive chemicals, degradation can be the most important factor to consider in selection of chemical resistant gloves. This product contains nitrile rubber, which may cause allergic reactions in individuals who are known or suspected to be allergic to nitrile rubber. If an allergic reaction occurs, stop using immediately and consult a physician. This product is not made of natural rubber latex.

EN ISO 374

Chemical Permeation (EN ISO 374-1:2016/+A1:2018 Type B)	Level	Mean Degradation % (EN ISO 374-4:2019)
J n-Heptane	2	29
K 40% Sodium Hydroxide	6	-32
P 30% Hydrogen Peroxide	4	13
T 37% Formaldehyde	5	11

Degradation levels indicate the change in Puncture Resistance of the glove after exposure to the challenge chemical.

EN ISO 374

EN 16523-1:2015+A1:2018 Classification of Permeation Performance Level

Measured Breakthrough Time (min)	>10	> 30	> 60	> 120	> 240	> 480
Permeation Performance Level	1	2	3	4	5	6

The penetration levels have been assessed under laboratory conditions and relates only to the tested specimen.

Resistance against Bacteria and Fungi - PASS
Resistance against Virus - Pass
